Vision of NeurotechEU

NeurotechEU envisions Neurotechnology as providing strategic bridges between various disciplines, including neuroscience, medicine, engineering, artificial intelligence, cognitive science, robotics, social sciences, and the humanities. We aim to be the backbone of this new vision by bringing together leading universities across Europe to create a unique educational environment where the new generation of Europeans who are able to cooperate and work within different European and global cultures, in different languages, and across borders, sectors and academic disciplines, are brought together.

NeurotechEU delivers education and training for all segments of society and in all regions of Europe, educating students across all levels and shaping the next generation of multidisciplinary scientists, innovators and entrepreneurs that will address Europe's challenges in technology and health.

ACCOMPANYING NATIONAL PROGRAMME

Priorities and Project Activities

- Planning and implementation of new mobility offerings (physical, online, hybrid, blended) in cooperation with the Alliance partners.
- Development and implementation of an alliance-wide internship programme for BA and MA students of all Alliance partners at University of Bonn laboratories.
- Providing needs-based German as a Foreign Language courses tailored to the target groups, for which students from partner universities receive credit.
- Development of a digital teaching concept for German as a Foreign Language.
- Organizing of work and networking meetings with the Alliance partners to strengthen partnership relationships and cooperative project work.
- Organizing summer and winter schools, conferences, workshops and other events for the Alliance's various target groups aimed at furthering international mobility and cultivating intercultural competency.
