Vision of Neurotech^{EU}

From health and healthcare to learning and education, neuroscience offers great promise to provide brain-centred or brain-inspired solutions that address some of the most pressing social and economic challenges facing Europe. NeurotechEU aims to be a key player in achieving this vision.

Bachelor, Master and doctoral students receive comprehensive multidisciplinary training at all eight partner institutions, developing a European identity in a multicultural and multilingual setting. This next

generation of scientists and engineers will have access to cutting-edge infrastructure for basic, translational and applied research while we help them become the transformative leaders of society, industry and the academic world.

NeurotechEU also actively promotes life-long learning and, working together with more than 250 partner organizations, will help Europe become the global leader in brain research and technology.

ACCOMPANYING NATIONAL PROGRAMME

Priorities and Project Activities

- Consolidation of all existing University of Bonn courses in the broad range of content offered by NeurotechEU and inclusion in the **Campus+ virtual teaching and learning platform**, as well as providing advice to students and interested parties at the partner universities about the courses offered by the University of Bonn
- Maintenance of contacts with associated partners in Germany, acquisition of partners to provide their own courses in NeurotechEU and **participate in transfer-oriented projects**
- **Expansion of university partnerships** within the framework of the European University that go beyond the narrow technical context by initiating and promoting bilateral and multilateral cooperation projects (synergy projects)
- Provision of target group-oriented, needs-based **online courses in German as a foreign language** that can be attended by students at partner universities and recognized in as many foreign degree programs as possible
