Vision of EUGLOH

It is EUGLOH's vision to train future generations of European global health experts. The concept of global health, here, is based on the insight that health can no longer be viewed only in terms of medicinal aspects and as an exclusively human matter. Instead, a holistic approach is needed that emphasizes interdisciplinary cooperation and, for example, also includes environmental and social sciences.

Furthermore, the understanding that societal challenges cannot be tackled in national silos but require transnational efforts plays an important role.

Accordingly, it is the goal of EUGLOH to prepare future experts to develop solutions for societal issues within international and interdisciplinary teams. To this effect, EUGLOH will create a European Campus across all partners with a high level of joint structures.

With this approach, EUGLOH strives to become a leading global health alliance and to thus not only strengthen Europe's competitiveness in higher education and research, but to foster European values, such as equality of opportunities and inclusion, as well.

ACCOMPANYING NATIONAL PROGRAMME

Priorities and Project Activities

- Support of the operative execution of LMU's work package "**Sustainability & Dissemination**", e.g. through hiring an Outreach Officer or by conducting a workshop series on "Writing Global Health", which teaches students and researchers to effectively communicate their research to different audiences.
- Development of an **online introductory module „Global Health“**, which will be offered at all five partners in Public Health and other health-related fields of study as an elective in a blended-learning format.
- Implementation of **virtual internships**: Based on the problem-based learning concept, students' practical and methodical skills as well as their ability to independently work in study-related jobs will be fostered by offering realistic virtual work experience in global health.
- **Mobility program for doctoral candidates**: financial support for study and research stays for PhD candidates from LMU at EUGLOH partner universities for up to three months.
