National Initiative

Partner Institutions

Vision of EUNICE

EUNICE stands for a university alliance with an inter-university campus that connects students, lecturers, researchers, and administrative staff in various hubs.

As an alternative to traditional universities, which are often more closed and less flexible, this educational decagon is based on an integrated network with great intellectual and infrastructural potential.

EUNICE aims to become a transformative pillar in Europe, offering a holistic projection of higher education, research, the labour market, economy,

and society through cross-interactions between universities, industry, and socio-cultural institutions.

Involving individuals trained on the basis of new values, knowledge, and skills, with the aim of creating fairer and more balanced societies and enabling development that respects people and the local as well as the global environment. This transformation of the educational experience through personalised paths and interdisciplinary approaches addresses global challenges and strengthens Europe's competitiveness.

ACCOMPANYING NATIONAL PROGRAMME

Priorities and Project Activities

- **Mobility Task Force and Empowerment:** Facilitating the refinement of BTU's profile as a member of a European University through collaboration with EUNICE partners, ensuring accessibility to all status groups within BTU in a low-threshold manner, and establishing incentives for participation and various forms of mobility. This involves further developing and implementing coordination processes and digital workflow scenarios, reducing mobility barriers, introducing new mobility formats, and empowering all BTU status groups to engage in an intercultural context.
- **Immersion, Quality Assurance and Consolidation:** Enhancing the transversal competencies of BTU departments involved in administrative processes; organising new internal funding mechanisms as well as information and advisory services, such as BTU – EUNICE Starter Funds; conducting fact-finding activities to generate joint project ideas; initiating measures to support the goals and action areas of BTU's internationalisation strategy.
