

European University Networks (EUN)

National Initiative

Vision of SEA-EU

SEA-EU, the European University of the Seas, is an alliance of nine European coastal universities, all united by their coastal identity. Together with its associated partners, SEA-EU is dedicated to shaping the future of Higher Education in Europe. All students and staff at the SEA-EU partner universities are members of the alliance and benefit from a growing portfolio of courses, resources and activities.

SEA-EU's vision is to establish an international, multilingual and interdisciplinary European University campus, where staff and students move freely and securely, experiencing

Europe through shared tasks and collaborative activities, and together building a sustainable future.

SEA-EU works to strengthen the links between teaching, research, innovation and knowledge-transfer activities across the alliance, establishing best practices and standards, thereby contributing to a more resilient, open and competitive European Education Area. SEA-EU actively fosters an entrepreneurial and growth mindset of our members, supporting activities promoting sustainability development and innovative solutions for our societies and planet.

• Creativity • Sustainability

ACCOMPANYING NATIONAL PROGRAMME

Priorities and Project Activities

- **Communication** – In line with our long-term vision of ensuring the sustainability and competitiveness of the alliance, we focus on the communication of the alliance's activities and opportunities within the CAU as well as training students from across the alliance in science communication, empowering them to engage with multidisciplinary audiences in diverse topics.
- **Digitalisation** – Across the alliance a wealth of courses has been created and made available in digital formats. Maintaining this development, we continue to catalogue and ensure information about these courses is readily accessible for our members by way of online databases.
- **Diversity and Inclusion** – Diversity and inclusion are core values of SEA-EU. In addition to holding events on various aspects surrounding the topics of diversity and inclusion, we encourage and strengthen research collaborations on gender, diversity, inclusion and disability through short research stays.
