

European University Networks (EUN)

National Initiative

Vision of Una Europa

Una Europa aims to cooperate intensively in bilateral and multilateral relations in the fields of research, study, and teaching. Together, the partners want to use their strengths to create a genuinely European inter-university environment, the University of the Future. This includes joint degrees and doctoral programmes, exchange and mobility of students and researchers, and collaboration in European and international research networks. Another focus is the development of innovative cooperation formats in research, teaching, and administration. At the scientific core of the alliance

are six focus areas in which innovative formats will be tested and applied: Cultural Heritage, Data Science & Artificial Intelligence, Europe and the World, Future Materials, One Health, Sustainability. The joint work has already resulted in a number of Una Europa flagship projects. Last but not least, the alliance wants to initiate real transformation processes, because students play an important role in shaping the university of the future with great commitment.

ACCOMPANYING NATIONAL PROGRAMME

Priorities and Project Activities

- The **Una Europa Early Career Host Programme** aims at enabling competencies for Postdocs, PhD students, and undergraduate students in organizing scientific events. By implementing their own projects, they have the opportunity to establish networks among peer early career researchers.
- We fund mobilities in research, teaching, and administration through our **Una Europa Starter Funds** to support bottom-up initiatives for collaborations within the alliance. This should enhance partnerships, enable exchanges, and facilitate continuous education.
- We additionally want to support the continued development of collaborations in the alliance through the promotion of **digital teaching and research opportunities**. Together with **community building** measures, we aim to strengthen the sense of belonging to Una Europa across all status groups.
- Our engagement in the field of **Citizen Science** wants to reach out beyond the alliance to external groups who want to enter into a dialogue with science.
