

European University Networks (EUN)

National Initiative

Vision of INGENIUM

Our vision for 2030 is that the INGENIUM European University has been built on its very wide geographical footprint and strengthened by its shared educational and societal objectives. INGENIUM has grown strongly by building on the cultural diversity, the wide range of courses delivered as well as the varying typologies of its constituent institutions, which range from traditional universities to technical universities and universities of applied sciences and medicine. INGENIUM has successfully and incrementally advanced the delivery of modern university education in line with the EHEA objective of innovating

in learning and teaching intuitions. Inter-campus mobility for students and staff is a significant hallmark of the alliance.

Transversal objectives in promoting entrepreneurship, digital learning and outreach programmes have been supported by the sharing of best practices and have been fully realised. Constituent universities have collaborated very successfully in line with the objectives of European Universities to provide wide-ranging international opportunities for students, researchers, staff and regional stakeholders.

Network
INGENIUM

Heterogeneity • Diversity • Sustainability
• European Campus • Collaborative Online International Learning (COIL) • Physical and virtual mobility • Innovative concepts of teaching • International development of research dimension

ACCOMPANYING NATIONAL PROGRAMME

Priorities and Project Activities

- **Knowledge management** – promotion of INGENIUM by transferring previous project results: furthering the development of transitory technologies and technical interfaces.
- **Cooperation** – enabling successful and active cooperation in the areas of teaching, research, administration and third mission within INGENIUM: development and implementation of **virtual collaboration formats**; virtual and physical **mobility** within INGENIUM for students and staff.
- **Teaching with digital components** – **Collaborative Online International Learning (COIL)**: technical and media didactic support for the teaching staff in order to implement digital teaching at HKA; **innovation fund** for international digital teaching.
- **Internationalisation** as part of the university profile: raising awareness of the importance of the European dimension as a profile feature among the academic and administrative staff as well as the students at HKA.
