## National Initiative

Partner Institutions

## Vision of EuroTeQ

Educating the engineer of the future!

The EuroTeQ Engineering University will build a joint, future-oriented engineering education across disciplines, national borders and institutions. Our goal is to view technology developments holistically in a new way, to involve all relevant stakeholders and to strengthen societal cohesion in Europe. The EuroTeQ Campus will be open to students from partner universities, enable lifelong learning, and be accessible to professional engineers and trainees in technical

fields. With flexible curricula and new digital formats, a European University is emerging that promotes mutual understanding among all stakeholders responsible for technology-driven value creation. Together with 45 cooperation partners from industry, engineering associations and various societal sectors, education and professional practice will be intertwined in order to explore the concrete challenges of the 21st century and jointly pilot solution strategies.

Engineering Education of the Future •  
Technological Value Co-Creation • Life Long Learning • Innovation • Societal Cohesion • Knowledge Square • Individual Learning Paths

ACCOMPANYING NATIONAL PROGRAMME

## Priorities and Project Activities

- **Virtual campus and mobility for tomorrow** – accessible, flexible and international. Continue harmonising the systems to raise international student mobility and enable a seamless digital administration and recognition of international learning experiences.
- **Digitalisation and new competences** in teaching – innovative, modern, flexible. Accompanying measures to support teaching staff in piloting and establishing new, digital teaching and learning formats at the partner institutions.
- **Acquire, strengthen** and use intercultural competences – via a workshop series for intercultural awareness in future engineers.
- **Project and partnership management** and a **professional communication** to continue the strategic dialog with the partners and relevant stakeholders.
