Vision of NEOLAiA

The NEOLAiA Alliance premise is predicated on transforming regional connectivity embracing digital transformation, through inclusion and diversity in a context of enhanced mobility. These are the key pillars to achieve the broader goal of building an integrated European University. The vision of the Alliance is based on values as a European University supported by its core missions of innovative and inclusive high-quality education, cross-university research; entrepreneurship, and societal engagement, in a digital environment.

To materialize this vision, it is aimed to transform higher education for

students, academics and staff, through innovative, and interactive experiences that are relevant to the regions, their interconnectedness and improved ability to face shared challenges. The project will achieve this by working collaboratively towards a fully integrated and inclusive alliance of regions based on transnational European legal entities and by enacting the activities on regionally-rooted education, research, and societal engagement to improve the European community's mutual collaboration, understanding, and wellbeing.

ACCOMPANYING NATIONAL PROGRAMME

Priorities and Project Activities

The participation of Bielefeld University in the NEOLAiA network represents a significant step forward in pursuing the objectives of the national initiative program. The availability of national funding provides a valuable opportunity to concentrate on specific goals.

Activities:

- Enhanced mobility and high-quality higher education
- "Digital Student Data Portability"
- Improvement of administrative coordination
- Development of relevant placement structures in the Career Service
