Vision of ERUA

ERUA is an alliance of reform-oriented universities, whose main aims are to reflect upon, assess and advance alternative, sustainable models of higher education, foster critical thinking within the university community while defending a strong student-centred focus at the core of their academic reform approaches and practices.

ERUA universities are standing 'on a critical edge' – in terms of values, geography and expertise in education and internationalisation. They foster the development of a sustainable

society, address contemporary challenges and structural transformations while promoting European values.

With this shared common vision in mind, the European Reform University Alliance (ERUA) will become a role model for other alliances in terms of diversity, inclusion and ethos of participation. It will develop educational programmes and research projects geared towards societal impact and social inclusiveness.

ACCOMPANYING NATIONAL PROGRAMME

Priorities and Project Activities

DIGITALISATION:

- Implementation of “**Digital Student Data Portability**”.
- Digitalisation of courses and research results.

INTERNATIONALISATION:

- **Annual ERUA research weeks** and research stays at the European University Viadrina for early career researchers.
- **Support for researchers and teaching staff through student assistants** to compensate for the temporary additional coordination effort in the initiation of cooperation processes.
- Internationalisation of administrative processes through the systematic **translation and explanation of administrative documents** in English.

STUDENT ENGAGEMENT:

- Strengthening a culture of student engagement by **hiring and training student coaches**.
